Seamless integrations with other Microsoft solutions like Teams, Power BI, and Dynamics 365 for a unified user experience.

Security & Governance

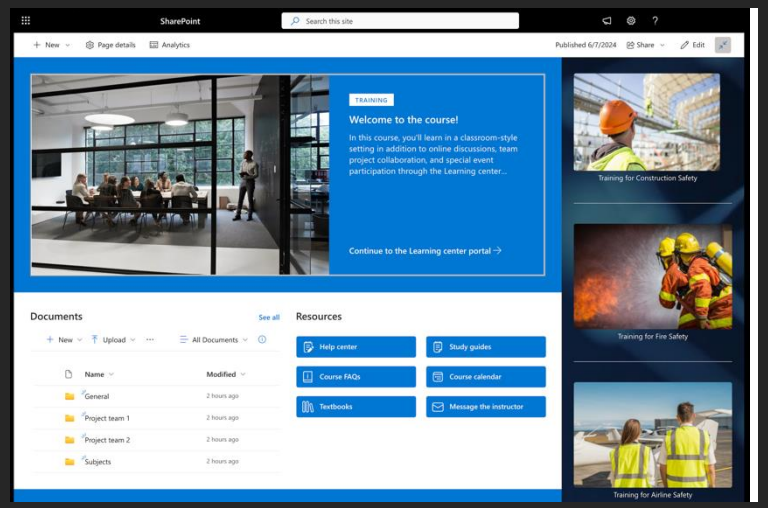
Post-Migration Support to ensure a successful transition and user adoption of the new SharePoint environment.

Ongoing Support

Help Desk Support and ongoing customization and updates to your SharePoint environment.

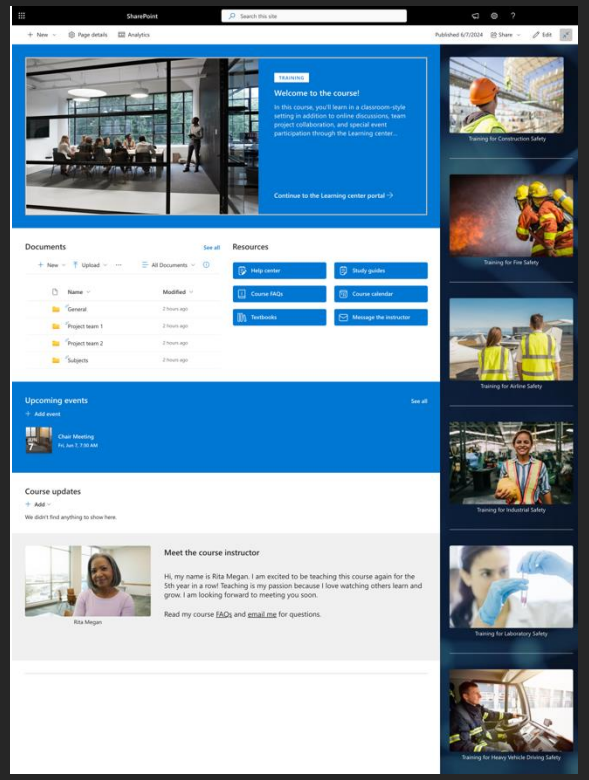
Case Study - 1

SharePoint Streamlines Operations for a Leading Training and Compliance Provider



A leading US-based provider of training and compliance solutions improved document management, team collaboration, and task tracking by implementing a SharePoint Online portal, featuring an organized DMS, streamlined task management, and seamless integration with existing business processes.

- **Document Management System (DMS)**
- **Task Management**
- **Integration with Existing Business Processes**

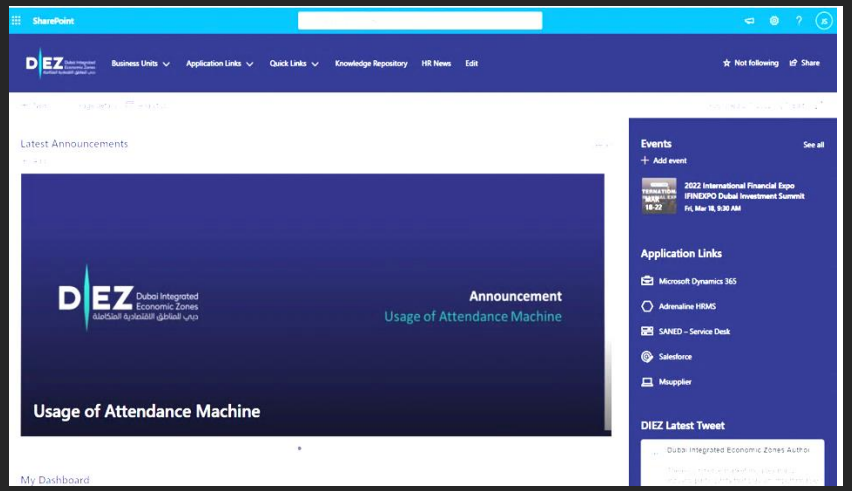


Key Components and Integrations

- A custom main dashboard with various dashlets was developed to track document and task status, utilizing JavaScript, HTML, CSS, and .NET plugins for interactive data visualization.
- Advanced search functionalities were implemented, including metadata search and filters based on author, department, content type, document type, and keywords.
- Training sessions were conducted on setting up workflows with notifications to automate document-related processes.
- A granular access control system was configured to protect sensitive documents. Permissions were assigned for creating document folders based on departmental requirements.

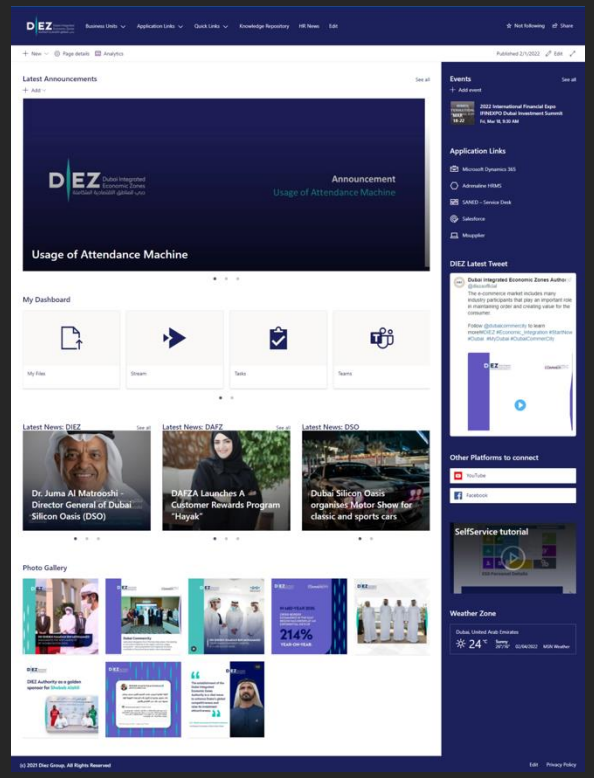
Case Study - 2

Dubai Airport Freezone Authority Streamlines Operations with SharePoint Online



Dubai Airport Freezone Authority (DAFZA) sought to enhance document management, streamline business processes, and increase transparency across departments. Their existing system lacked automation and a user-friendly interface, hindering efficiency and collaboration.

- **Document Management System (DMS)**
- **Correspondence Management System (CMS)**
- **Multilingual Support**
- **Business Process Automation**

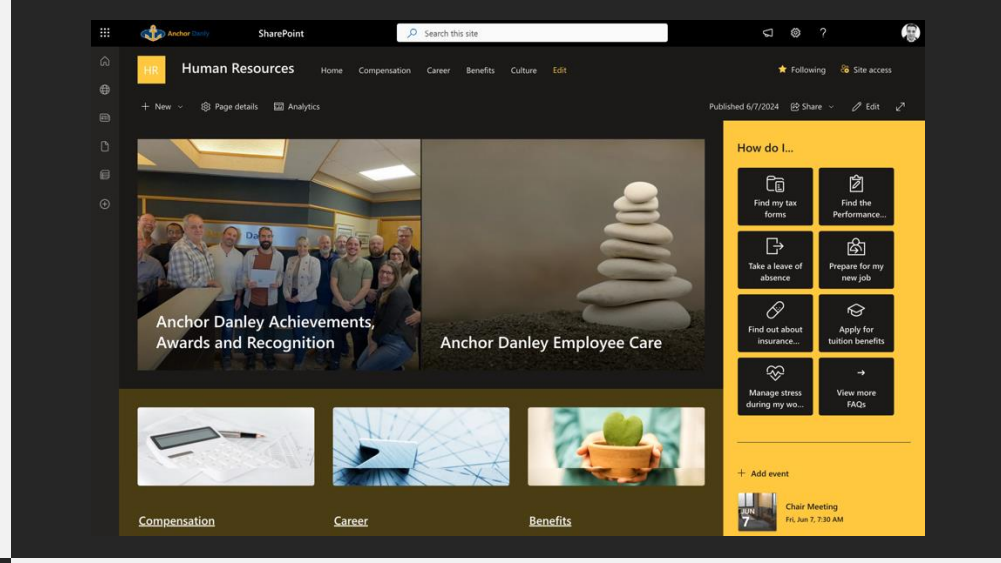


Key Components and Integrations

- Custom dashboards were developed to track document status, task progress, and key performance indicators (KPIs) across departments.
- Advanced search functionalities were implemented, including metadata search and filters based on document type, author, department, and keywords.
- A granular access control system was configured to ensure data security
- Existing customer and product data from DAFZA's CRM system was migrated to the new SharePoint environment.
- Custom forms were developed using PowerApps for various purposes.

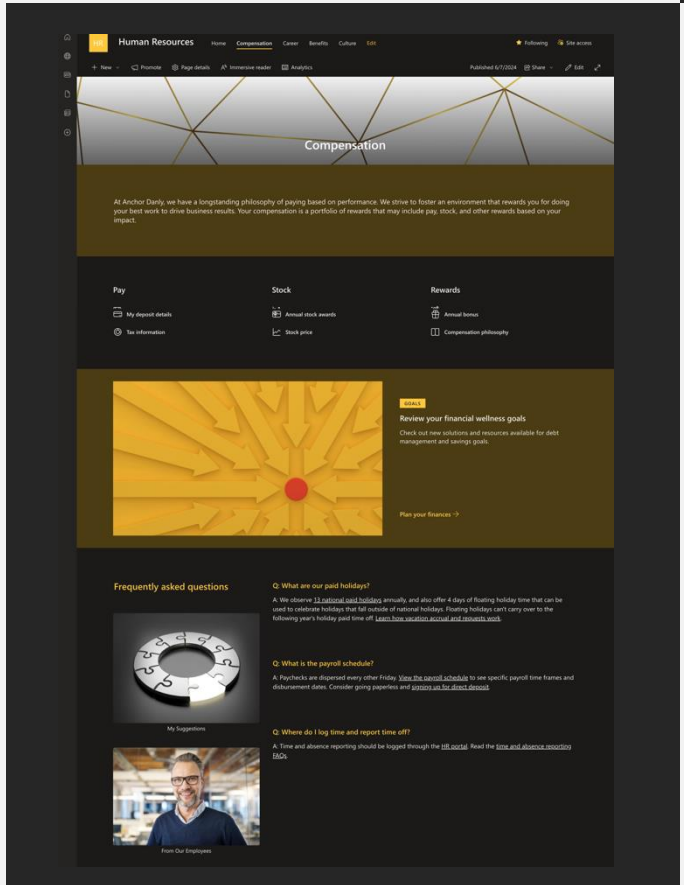
Case Study - 3

Streamlining Anchor Danley's HR Operations with SharePoint Online



Anchor Danley improved HR efficiency by partnering with Zelite Solutions to implement a comprehensive SharePoint Online solution, centralizing HR data, enhancing collaboration, automating workflows, structuring the recruitment process, and providing real-time reporting for valuable insights.

- **Centralized Platform & Collaboration Tools**
- **Automated Workflows**
- **Structured Recruitment Process**
- **Real-Time Reporting**



Customized SharePoint Online solution

- A centralized platform for HR data and documents, enhancing accessibility and eliminating data silos.
- Collaboration tools to streamline communication and knowledge sharing among HR staff.
- Automated workflows for tasks like recruitment and travel expense management, reducing errors and processing time.
- Structured recruitment processes and real-time reporting for better candidate management and data-driven decision-making.
